Christian Science Services

In Odd Fellows' Hall every Sunday morning at 11 o'clock. Subject for Oct. 20.—Doctrine of Atonement. Sunday School at 12:15. The public is cordially invited.

The Campbell Farmers Union Packing Co. has just loaded a car of prunes destined for Bremen, Germany and Copenhagen, Denmark. Thus are the products of our valley sent to supply the nations of the world.

Mr. Daniel Frink and sisters of Hollister were guests of Mr. and Mrs. Posten last week—making the trip by auto. Their hosts accompanied them upon their return for a week's vacation at Hollister and Santa Cruz.

Miss Myrtle Hayes, a niece of A. G. Williams was married Sunday to W. C. Nutting. Miss Hayes spent a year here with her uncle and had a wide circle of friends among the younger set, who extend their best wishes for a happy future.

Mr. and Mrs. S. G. Nelsen, Mrs. L. F. Shaw and Rev. and Mrs. G. E. Atkinson went to Pacific Grove Tuesday to attend the Congregational Conference. They made the trip in Mr. Nelson's car which added materially to the pleasure of the occasion.

Mrs. E. S. Brown and little daughter left Monday for Bremen, Indiana, where they will visit Mrs. Brown's mother, expecting to be away about three months. During their absence Mr. Brown will remain in town as he is employed at Santa Clara.

The Countrywoman's Club held a very interesting session Monday afternoon at the home of Mrs. Sykes. Mrs. Shaw addressed the meeting on behalf of the Sempervirens Club regarding the State highway into Redwood Park which the Club hopes to secure.

Dr. Merrill, who is district medical examiner for the Metropolitan Life Ins. Co., spent Wednesday in San Francisco as guest of the company. The medical examiners of the state were called together for a business and social session and spent a very pleasant day, ending with a sumptuous banquet.

Sunnyside and Vicinity

Dr. E. H. Owen is quite ill.

Mrs. Arnot is suffering from a severe attack of rheumatism.

Mrs. E. E. Phelps and Mrs. Austin have been on the sick list but are now recovering.

Mrs. Wm. Donaldson has a letter from her son, who has a dairy at Biggs, stating that help is so scarce in that locality that he will be unable to take his annual vacation.

Mrs. R. W. Kennedy motored up to Berkeley the first of the week to see her daughter, Mrs. Spaulding, who, assisted by her son, Master Robert Ralph Spaulding, has been running the University Garage while Mr. Spaulding is in the hospital recovering from his late severe accident.

The enterprising property holders of Sunnyside are taking time by the forelock and are preparing for any season, hereafter, dry or wet. E. E. Phelps's new well is finished and in successful operation at a depth of 112 feet. It was Mr. Phelps's intention to have it dug further but he was unable to pump the water out so that the digger could work. Robert Scholz, assisted by Cecil Kennedy and Roy Vollman has just finished a pit for himself, getting water at 112 feet. Mr. Schnackenberg and son have just started one on their place and Kennedy & Kennedy are still working at theirs on Budd Avenue. Geo. Page is boring for them. They have one 10-inch hole down 250 feet and are intending to bore another. They have about 75 feet of water.

Bull Moose Meet

Yesterday afternoon the Progressive Republicans, under the direction of C. J. Ringe, committeeman from Campbell, held political meeting at the Coffee Club. Notwithstanding that the hour was inconvenient for many quite a large audience was present. Many women were out, showing their interest in the political issues of the day.

Chester H. Rowell gave the principal speech of the meeting dwelling on the progressive movement and legislation of this state which needed further support of the voters. He urged them to stand by Hiram Johnson and his followers to keep up the good work.

Attorney Bohnett, a Campbell product, gave a short talk on the work of the legislature of which he was a member and asked that he be returned to that body. Campbell will do it best to return him.

Attorney Frank Benson, candidate for State Senator was then called on to give a short talk. He stated his views on the issues before the people today and on his stand on these issues he asks his election to the upper house of the legislature.

Chairman Green of the County Committee gave a few pointed remarks.

During the program Mrs. Ringe presided at the phonograph which gave several pretty pieces.

48th Semi-Annual Convention

The forty-eighth semi-annual convention of the Santa Clara Co. C. E. Union will be held in the Congregational church of Campbell, Saturday and Sunday, Oct. 19-20.

The public in general and especially the young people, are invited to attend the meetings which will be both interesting and profitable. Dr. W. C. Sherman, Alden Pratt and Paul Brown are the principal leaders and speakers of the Convention.

Following is the program for the sessions.

Saturday Morning

9:00 Registration
9:20 Quiet Hour—Led by Rev. Atkinson
Praise Service
10:00 Missionary Session
Call To Service—Heralda Tyng
Twenty Years in Korea—Graham Lee

Saturday Afternoon

1:15 Praise Service
1:25 Devotional—Rev. Porter, Morgan Hill
1:40 Intermediate Session (In the Church)
Evangelistic Conference (In S. S. Room)
2:40 Conference with Dr. W. C. Sherman
3:40 General Meeting—Alden Pratt and Paul Brown
4:40 Business Session
Conference led by Paul Brown
6:00 Sharp—
Convention Banquet at Church Parlor

Saturday Evening

7:15 Praise Service
Devotional—Led by Paul Brown
7:30 Announcements
Presentation of Banners
Pledge Raising
Collection
8:15 Address—Dr. W. C. Sherman

Sunday Morning

7:30 Sunrise Prayer Meetings
Campbell-Congregational Church
San Jose-Cong. Church 3d St. and San Antonio St.

Sunday Afternoon

3:00 Meeting led by
4:30 Intermediate Meeting—Led by Alden Pratt
6:00 Young People's Prayer Meeting

Sunday Evening

7:15 Praise Service
Devotional
7:45 Installation of Officers
8:15 Convention Address and Consecration

Service—Dr. W. C. Sherman

Theme: "The Surrendered Life"
Motto: "Nevertheless, not my will but Thine be done"—Luke 22:42

Rally Day Service

The programme given at the M. E. Sunday School on Sunday, Oct. 20, for the rally day service will be well prepared. The Primary little folks will sing a couple songs and many of them will recite verses which they have been urged by their teachers to learn from Sunday to Sunday. Everybody is invited; come and hear the little folks. The singing will begin at 9:45 o'clock sharp. We thoroughly believe in a Sunday School for the young people in our town, and believe it would be a good thing to see the boys and girls being taught in such schools instead of lounging around on the streets and having their minds filled with that which is a ruin to any person.

Come on the 20th and just visit for once, then determine whether you would like to come again or not.

We expect to have a special day for singing soon, if you like music watch for the announcement then come.

J. C. GORDON,
Supt.

Farewell Reception

The parlors of the Congregational church were very attractively decorated Friday evening when the ladies of the church were hostesses at a farewell reception in honor of Misses Charlotte and Harriet Palmer. Cut flowers were used in profusion and the table, from which punch and cake were served, was artistically draped with pepper branches and dishes of pansies, and overhead was a canopy of green.

The rooms were well filled with members of the Congregation, and Sunday School in which the two ladies had been faithful teachers.

A short program was given, and Miss Charlotte was presented with a very pretty hammered brass jardiniere, and Miss Harriet with an engraved souvenir spoon by their respective classes.

The company dispersed amid expressions of good-will for the honored guests.

P. P. I. E. STAMPS

Postmaster General Hitchcock has directed that 80,000,000 one cent, 150,000,000 two cent, 8,000,000 five cent and 5,000,000 ten cent Panama-Pacific International Exposition postage stamps be prepared and placed on sale in the Postoffices beginning January 1st, 1913. The stamps are about three-fourths of an inch high by one and a sixteenth inch wide. At the top appear the words: "U. S. Postage," and "San Francisco, 1915".

The one cent stamp is green. In the center appears within a circle a bust of Balboa, discoverer of the Pacific Ocean. The two cent stamp is red. It represents the Gatun Locks of the Panama Canal.

The five cent stamp is blue and represents the Golden Gate of San Francisco Harbor.

The ten cent stamp is dark yellow. The subject is "The Discovery of San Francisco Bay."

The Seven Sleepers.

The seven sleepers of Ephesus, a favorite subject in medieval art, were seven Christians who to escape the persecution of Decius concealed themselves in a cave whose mouth was closed by their enemies. The cave was rediscovered 200 years afterward, when the sleepers awoke youthful and in perfect health.

Both Wrong.

"You have deceived me," she complained. "You gave me to understand that you were rich."
"Well, you deceived me, too," he replied. "You caused me to believe that you would be brave and cheerful if it ever became necessary for us to get along on a small income."—Judge.

ADVERTISEMENTS.

Found: A bunch of keys. Call at the Press Office.

Wanted to buy almonds and English walnuts. Enquire at this office.

For Sale: A single barrel Stevens 12 gauge shot gun. See J. C. Gordon.

Heald's San Jose Business College prepares young people for success.

Campbell - - - California
RECALL OLD RECORDS

AMERICA HAS HAD HORSES OF
RARE RENOWN.

Interesting Comparison of Those of
Eighty Years Ago With Jerry M.'s
Recent Remarkable Race
In Ireland.

Carrying 175 pounds and racing over
turf, making many jumps, Jerry M., an
Irish thoroughbred, covered a distance
of four miles in ten minutes flat. He
is considered the greatest horse in
Ireland, and perhaps on the continent,
and in view of the heavy weight
carried, is truly a wonder. But, says
a writer in the Horsehoers' Journal,
what about the old warriors of the
American turf, those of the '30s and
'40s going the same route, working at
the trotting gait and covering distances
in a little slower time.

The Dutchman, in May, 1836, on the
Centerville (L. I.) course under saddle
and at the trotting gait, went four
miles in 10:51. The weight carried by
the horse is not stated, but judging
from Hiram Woodruff's scaling of
160 pounds, without saddle, it is safe
to say that the Dutchman carried nearly
as much weight as Jerry M. did
when he won the Liverpool Grand National
Steeplechase recently in ten
minutes.

When it is considered that the
Dutchman worked at the trotting gait,
the performance is all the greater.
Ten minutes and fifty-one seconds for
four miles was the best of early days,
and the mark was a record for many
years for trotters working under saddle.
Reduced to miles it means that the
average for each was 2:42%.

The record for runners for four
miles made previous to 1842, was held
by Fashion, who won over Boston, a
nine-year-old, in 7:32% or 1:15% for
each mile covered. The record was
established at Union Course, L. I., in
May, 1842, the best previous record
for the same distance being held by
Eclipse in a race with Henry over the
same course in May, 1823, the time being
7:37.

The wonderful prowess of Eclipse
and other horses of the time was estab-
lished by the fact that they could
repeat the same long distance on the
same day, though not in time as
fast as the first heat. Eclipse in his
race worked under the three in five
plan, and each heat was made in time
as follows: First heat, 7:37; second
heat, 7:49; third heat, 8:24. This was
in 1823, 89 years ago, when blood was
put to a test, the four miles route be-
ing not an uncommon thing to wit-
ness.

Tracing the lines of the thorough-
breds back into history, how many
times we see the name of Eclipse men-
tioned; his blood intermingles with
the very select of the present day,
and the reason why is easily seen.
Time has not made great changes in
the thoroughbred line if the perform-
ances of Eclipse are figured up.

Still, It Seemed Warm.
A Cherryvale merchant came home
from the breeze of an electric fan and
three loof cakes last night and said
peevishly to his wife: "You can cer-
tainly get this house good and warm.
What do you do to do it?" And the
wife replied meekly, as she pushed
back the few straggling hairs and
nuzzled them in place with a grinning
wire hatpin: "I don't see why it is
hot; I put a ham on to boil at six
o'clock this morning and baked bread,
and did a little ironing, and while I
had the oven hot I baked a batch of
cookies and a couple of pies and heat-
ed the water for the children's baths
and scrubbed the floor. But I haven't
had any fire to speak of except to
broil a steak and bake some potatoes
since five o'clock this afternoon. It
seems kind of cool-like to me."—Cherry-
vale (Kan.) Journal.

High Prices for Pictures.
I have before me the catalogue.
If you went through it with me we
should mark the general increase in
prices, and we should see how fash-
ion is a particular and powerful fac-
tor in some cases. I could show you
fine Holbein portraits—"Charles
Brandon, Duke of Suffolk," with the
marked price £50 8s; "Martin Lu-
ther" and "Lady Guilford," £30 and
£16 respectively; "Anne Boleyn" and
"Calvin," together £28 7s, and so on.
Then we could reflect upon "The
Duchess of Milan," by the same mas-
ter, which was presented to the Na-
tional gallery by the National Art
Collections Fund at a cost of £72,000.
—London Opinion.

Rats and the Plague.
There is a theory that the old
brown rats aided the spread of
plague in Europe, because the fleas
which infest them are more likely to
take up their abode on human beings
than are the parasites of the Norway
rat. This is hardly demonstrated be-
yond the fact that the cessation of
plague epidemics in England and west-
ern Europe was about coincident with
the Norway rat invasion. It seems to
have been proved in California that
the gray rats can spread the infection,
but if the black rats spread it faster,
we may yet be brought to concede
some good in the gray Norway rat
pest that has heretofore driven out its
older brother.

FARM AND
GARDEN

PRODUCTION OF ONION SETS

Industry Is Now Receiving More Gen-
eral Attention Than Formerly
—Market Is Wide.

(By W. R. BEATTIE.)
The term "set," as applied to the
onion, indicates a small, undersized
bulb which, when replanted in the
ground, will produce a large onion.
This method of producing onions is
perhaps the oldest and now the most
universally employed for the growing
of small areas of onions in the garden
and where an early crop is desired.
The common method of producing sets
is to plant a large quantity of seed on
a small area of rather rich land and

Onion Sets Drying on Trays Piled in
a Field.

thus procure a great number of bulbs
that are undersized, owing to crowd-
ing and lack of plant food. The
greater number of these bulbs do not
attain sufficient size or maturity to
produce seed the following season and
are really plants in which the process
of growth has been arrested.

In the United States the onion set
industry is largely confined to a few
areas. The crop is extensively grown
near Louisville, Ky., Chillicothe, O.,
and Chicago, Ill., in the Platte River
valley of Nebraska, in southwestern
New Jersey and in southern California.
The entire area devoted to this enter-
prise in these localities is estimated
at from 2,500 to 3,000 acres. The yield
to the acre varies with the locality,
but the average about 300 bushels.
The market for onion sets is found
throughout the entire country, the
greater portion being disposed of in
small quantities.

The climatic conditions governing
the production of onion sets are prac-
tically the same as those for standard
onions, although it is not necessary to
plant quite so early in the spring.
Onion sets can undoubtedly be grown
in any part of the northern states
where suitable soil conditions can be
obtained. The soil adapted to onion
set culture is, as a rule, about the
same as that required for the growing
of large onions, except that the land
should not be so rich.

SET ALFALFA BY MACHINERY

Experiments Made in Transplanting
by Use of Machine Used for
Tobacco and Tomatoes.

Prof. H. A. Hansen of North Dakota,
who has introduced many hardy
plants from Siberia for the depart-
ment of agriculture, among them
early strains of alfalfa, has been ex-
perimenting in transplanting the lat-
ter with a machine, using one em-
ployed for tobacco, cabbage, caulif-
lower and tomatoes. At five points
in the state he set the plants at the
rate of 6,000 an hour. At other points
he set them with a plow. He thinks
this will do away with dodder and in-
jury from diskings. Some of the Rus-
sian alfalfa plants when given room
in the garden had 500 shoots from one
sown. Over 1,200 farmers are co-
operating with Professor Hansen and
many reports are coming in showing
their remarkable resistance to the
drought of last year.

LETTERS FOR MARKING BAGS

Initials Can Be Made of Beets or Po-
tatoes—Ordinary Shoe Black-
ing Used as Ink.

An initial marker for bags can be
made of a beet or potato. Cut off
enough of the vegetable to provide a
flat surface of sufficient size and then
cut out the letter as shown in the
sketch, from the Popular Mechanics,
and use shoe blacking as ink. In
rubbing, remember that most of the
letters must be made reversed in

Initial for Bags.

order to print right. For example,
in making a B, draw it out on paper
and cut it out, then lay the face of
the pattern on the flat surface of the
vegetable and cut around it.

Average Fertilizer for Corn.
Use 800 to 1,000 pounds per acre
of a fertilizer containing, actual po-
tash, 9 per cent.; available phosphor-
ic acid, 7 per cent.; and nitrogen, 2
per cent. The plant food in a top-
soil of the above formula may be supple-
mented by mixing 360 pounds of muriate
of potash, 1,000 pounds of acid phos-
phate and 260 pounds of nitrate of
soda.

SEASONABLE MILLINERY

Photo, Copyright, by Underwood & Underwood, N. Y.

Two seasonable millinery Flora trimmed hats, the Water Lily hat and
the Cactus hat. The Water Lily hat is a late summer style made of trans-
parent Millinette, which is waterproof and trimmed with water lilies. The
Cactus hat is of velvet in cactus green.

HANDY FOR THE TRAVELERS' WARDROBE NEEDS MUCH CARE

Probably Most Convenient Pin Cush-
ion That Has Yet Been Brought
Into Common Use.

A pin cushion that lends itself to
the needs of the traveler is a com-
bination affair of cushion and jewel
box. The leather frame is green, red
or drab blue, is octagonal in shape,
with a heavily padded cushion top
covered with velvet.

This top fits so tightly into the
lower part that none but the initiated
guesses at the double function of the
box. This makes it a safe hiding
place for trinkets.

An ingenious girl has copied one of
the combination cushions by using a
fancy candy box, six inches in di-
ameter and two inches high. She pad-
ded the top with wool, covered it with
pink chiffon velvet the tone of the
flowers in the gaily stamped border
and finished the edge with a narrow
silver braid.

Instead of using the bottom for
jewelry, she turned it into a collar
box. The dimensions enable her to
carry more than a dozen collars
without crushing.

BLOUSE.

Almost any blouse material might
be made up in this simple style; pin
tucks in sets of threes are made
across the front and in center back,
and one wide tuck is carried over the
shoulder to waist front and back. The
collar is hemstitched at the edge, and
the wristbands are finely tucked in
the center. Collar and small yoke of
spotted muslin.

Begin With a New Hat.

"A new hat I must have," says the
average woman each season, and a
new hat she does have, even if she
has to go without some of the neces-
sities to get it. Now this may seem
foolish to some, but in reality it is
very wise. With a becoming hat,
fresh and up-to-date, even though it
is accompanied by an old suit, provid-
ed it is neat and trim, a woman passes
as stylish and well dressed. Let her
appear, on the other hand, in a new
suit, with an old hat, dejected and
hopelessly out of fashion, and she is
immediately referred to as way be-
hind the times. And so it is that the
woman who is wise in dress matters
begins each new season with a new
hat.—Woman's Home Companion.

Good Parisian Idea.

The French are using flesh colored
tulle in combination with black gowns.
At a distance this has a startling ef-
fect as an exaggerated décolletage,
but it is decidedly becoming, because
the faintly flushed tulle is much softer
against the neck and arms than the
white or cream tones.

HAD PHONOGRAPHS IN EGYPT

Reports Are That Babylonian Tablet
Also Shows That the Wireless
Telegraph Was Known.

"We think we are a great people,"
said the retired army officer, taking
off his glasses, "and we feel that we
are progressing at a tremendous pace,
but here's a newspaper account say-
ing that the French government has
unearthed in Babylonia 45,000 tablets,
giving a history in full of the reign
of the ancient kings. Here we find
for the first time that Babylon, and
not Rome, was the real 'Mother of
Laws.' In those days there was a
system of courts and of appeals that
even suggested a recall. Sir, this re-
port also states that in the days of
Nebuchadnezzar they had a free rural
delivery of mail over every highway
in the kingdom. And shades of
Grover Cleveland!—It has also been
proved beyond a doubt that the Egyp-
tian government in 4,500 B. C., had
a perfected system of civil service.
There is a record that the first tur-
bine engine was invented by the
Egyptians, and that Archimedes de-
vised this mechanical contrivance by
which the fields could be watered
when the Nile was low. This is the
same principle that is used to drive
the latest additions to the Cunarders."

What shocked the doughty old
American most of all, says the Na-
tional Magazine, was the informa-
tion that four thousand years ago the
phonograph was used in ancient
Egypt, and was in reality only per-
fected by Edison in the nineteenth
century. There is evidence also of
the use of wireless telegraphy before
the Christian era, while the Egyp-
tian alphabet has proven to be a sci-
entific key to organized human speech.
It is a hard blow to our self-sufficiency
to find that the banjo of the southern
plantation with its fascinating
"thrums" only echoes the musical in-
struments used by Egyptians in pre-
historic times.

Is the Same Old World.

In reviewing Professor Frank Frost
Abbott's new book, "The Common
People of Ancient Rome," a critic
says: "It should be something of a
corrective to modern conceit to note
how little we have advanced since
paternalism first became dominant
in Rome and since the Roman govern-
ment prided itself on opening public
baths and washhouses for the people.
Los Angeles is doing that same thing
now and lauds herself as a pioneer
in civilization because of it. Docle-
tian denounced the rich and their
luxuries, attributed to them the high
prices of necessities, in language al-
most identical with a radical newspa-
per of today. Plautus tells us of the
trusts that were founded to control
prices and the trust problem was as
much a reality in ancient Rome as
it is today."

Market for Sharks' Liver Oil.

It has been proposed to start in Ma-
laysia a small export trade in shark's
liver oil. This oil is refined in Eu-
rope and sold as cod liver oil. In Oc-
tober the ocean sharks come into the
lagoon, between the barrier reef and
the atolls, to pair. At this time they
can be speared in large numbers by
people skilled in catching them. There
are several species of these sharks
and they ordinarily run from seven
to fifteen feet in length. The girth of
an ordinary shark is the same as its
length, and an eleven-foot shark
would be eleven feet around the body.
The liver of a shark of this size gives
about five gallons of oil. The oil
brings \$73 a ton. The sharks are
found in pairs and the harpooners try
to kill the male first, in which case
they are able to also spear the female,
as it does not desert its mate.

New York Alimony Club.

The Alimony club in New York, a
name adopted by a coterie of men
who are undergoing imprisonment
there for default in payment of allow-
ances to wives from whom they have
separated, held a banquet in jail on
Christmas day. Twelve sat down to
a good feast, two of them having
come back for the occasion, after re-
covering their liberty only two days
before. The popular song, "I Wonder
Who's Kissing Her Now," was
sung during every toast, and "Our Un-
fortunate Successors" was received
hilariously.

Oldest Newspaper.

The "Tching Pao," which is the of-
ficial gazette of Peking, and has just
celebrated its thousandth anniversary,
is the oldest newspaper in the world.
Ever since its inception, a copy of
each issue has been carefully pre-
served in the archives of the Peking
palace. Accuracy has always been
the keynote of his paper, and, in sev-
eral instances, its high standard, sev-
eral journalists on its staff in the past
paid the penalty of mistakes with
their lives. Dismissal, and, at the
worst, imprisonment, is the punish-
ment meted out at present.

Proud of Pet Swan.

Captain Peacocke, of Los Angeles,
whose name might indicate a sym-
pathy with the feathered race, has a
pet goose of the swan variety
known as "Russian swan." The bird
flew upon his land three years ago,
and has become domesticated to such
an extent that he follows the captain
like a dog and searches in his pocket
for popcorn or crackers. When the
pockets are empty the "swan"
looks disconsolate, like a dog who
has received a harsh word when he
expected a pleasant one.

WIT
and
HUMOR

GOOD DEFINITION OF "SNAP"

Near-Sighted Man Enters Wrong Flat
and Shoots Man and Woman,
Then Discovers Mistake.

A number of players and play-
wrights were discussing the question
of what constitutes the "snap" so per-
sistently demanded of the dramatist
by the manager of today.

"I have talked to so many man-
agers on this subject," said one writer,
"but none has been able to give me
any very definite notion as to just
what 'snap' is."

"I can help you out," said Eugene
Walter. "I have an idea for a one-
act play that just bursts with 'snap.'
I'll give it to you. Here it is:

"Play opens with man and woman
in drawing room, seated side by side
on a sofa and embracing each other
passionately.

"Enter to them a man with a suit-
case and an umbrella. He is, of course,
to all intents, husband unexpectedly
returned.

"Husband no sooner takes in the sit-
uation than he yanks out a revolver
and shoots both man and woman.

"Then he takes out his glasses, puts
them on, looks about him, and sudden-
ly gives a start.

"'Merciful heavens!' he exclaims.
'I'm on the wrong floor!'"

Poor Girl.

"How long have you been married?"
"It will be six months next Thurs-
day."

"And do you still regard your hus-
band as the most wonderful man who
ever was born?"

Then the poor girl broke down and
sobbed piteously. When she could
trust herself to speak again she said:

"No, Charles has disappointed me
terribly. I'm afraid I have been
wrecked my life. Last night when
I asked him to get up and see if there
wasn't a burglar in our room he
bumped his nose against the edge of
the open door and he said three sim-
ply awful swear words just as if they
came natural to him."

A GOOD EXCUSE.

The Customer—See here, I caught
one of your bartenders putting water
in the whisky today.

The Proprietor—Well, sor, ye see,
we have to make some concessions to
the timprance people.

Anxious to Serve.

Lawyer—It is reported that you
have frequently expressed yourself as
opposed to capital punishment?
Deacon Highsoul (drawn for jury
duty)—I won't have no scruples in
that man's case. He cheated me on a
hoss trade once.

His Point of View.

Here's a story of a ninety-pound
London woman who thrashed her
brute of a husband so soundly that
he's in the hospital for a long stay.

"I wonder when the London police
are going to put a stop to these suf-
fragist outrages?"

Rough on the Boys.

Professor—The average American
girl is poorly educated.
Girl Graduate—You think so?
Professor—Yes, but there is one
consolation, the average American boy
will never find it out.—Satire.

Her Poise.

"Isn't Mrs. Coinhunter's poise su-
perb?"
"Yes, indeed! Coinhunter told me
once it was her balance that first at-
tracted him."—Judge.

Descriptive.

Bobby—Uncle, couldn't a fellow
have a fine Sunday's dinner if he was
as hungry as me an' as roomy as you?
—Tit-Bits.

Walking Talk.

Bill—Do you know at just what age
a child begins to walk?
Jill—No; nor a cheese, either.

70 Years with Coughs

We have had seventy years of experience with Ayer's Cherry Pectoral. This makes us have great confidence in it for coughs, colds, bronchitis, weak throats, and weak lungs. We want you to have confidence in it, as well. Ask your own doctor what experience he has had with it. He knows. Keep in close touch with him.

One of Ayer's Pills at bedtime will cause an increased flow of bile and produce a gentle laxative effect the day following. Formula on each box. Show it to your doctor. He will understand at a glance. Dose, one pill at bedtime, just one.

Made by the J. C. AYER CO., Lowell, Mass.

Montessori Method Defined.

Probably you have heard vague rumors in the publications of this country—daily, weekly and monthly—of the "Montessori Method." Have you ever wondered just what this phase means? Well, here is the answer, simply and directly expressed. Are you ready? The Montessori Method is the education of the stereognostic sense, alias the visual perception of differences and dimensions, in children of pre-kindergarten age. That's all there is to it.

Work.

Man must work. That is certain, as the sun. But he may work grudgingly, or he may work gratefully, or he may work as a machine. He cannot always choose his work, but he can do it in a generous temper and with an up-looking heart. There is no work so rude that he may not exalt it; there is no work so impassive that he may not breathe a soul into it; there is no work so dull that he may not enliven it.—Henry Giles.

Acquiring Wisdom.

Not by years but by disposition. Wisdom acquired.—Plautus.

Watch Made of Glass.

Josef Baler, a glasscutter of Munich, after many years of patient toil, has succeeded in putting together a timepiece whose every wheel and screw, with the frame and each of the three covers is made of glass.

Foundation of Heroism.

A light supper, a good night's sleep and a fine morning have often made a hero of the same man, who, by indigestion, a restless night and a rainy morning would have proved a coward.—Lord Chesterfield.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Excellent Evidence.

A witness at Shoreditch (England), asked why he had borrowed a certain pencil from the plaintiff, replied: "To sign that document." "But it is signed in ink," said his honor. "Then I couldn't have had the pencil," replied the witness.

Costly Short-sightedness.

Many a man is spending all his spare cash trying to find a remedy for a digestion that he ruined with candy before he married it.

Weep If You Wish.

There are said to be 1,000,000 homeless cats in Chicago. People whose specialty is long distance sorrow, have our permission to cry their eyes out.

Use for Old Newspapers.

China uses millions of pounds of old newspapers, chiefly British, as wall paper for houses and cottages.

CLEANEST CITY IN WORLD

Traveler Says That Aix-les-Bains in Southern France, Well Deserves This Distinction.

I have found the cleanest city in the world. Very properly, it is the world's oldest watering place, for water means cleanliness. It dates back over twenty centuries. It is a little city of not more than 8,000 inhabitants, though this number is quadrupled during the height of the summer season, when all the world pays tribute to the remarkable efficacy of its salubrious warm baths. For the worn out, overworked American these baths have a peculiar fascination. Year after year the visitors from the United States include men of affairs, many notable in financial, business and professional circles. It is surprising that the rush of overworked Americans to this famous health resort, which has been so long a favorite resting place for titled Europeans, is not much greater. I am writing of Aix-les-Bains, or, as it is commonly called, Aix, says John A. Slescher in Leslie's.

Aix is in southern France, near the Swiss border. The snow capped peaks of the Swiss Alps, rising above and all around it, give to the clean little city a picturesqueness and a seclusion all its own. Two warm springs, gushing from the mountain at the rate of a million gallons daily, form the reason for the existence of Aix. These waters possess radio-activity, and their chemical elements, including chiefly sulphuretted hydrogen, render them most efficacious for gout, rheumatism and similar physical ills, the result of overwork, a sedentary life, lack of exercise and a too liberal diet.

The famous springs of Aix belong to the state. Its center of attraction is the bathing pavilion—a massive granite structure, with an imposing front and lofty wrought iron doors. It stands at the head of one of the principal streets and contains abundant accommodations for all the visitors, and the baths are of the greatest variety. The thermal waters are used only externally. The peculiarity of the bath at Aix is that it combines the douche with massage. I know of no other resort that gives anything exclusively of this kind, and no other springs, I am told, have the same chemical and radio activities that have made the water of Aix so efficacious for over twenty centuries, or since 125 years before the Christian era.

The Raggicker Bird.

The trumpeter bird is the raggicker of the woods and swamps of Guiana, where he is always at work at his trade, with his stomach for a pack and his bill for a hook. He performs a useful but most extraordinary service, devouring a perfect multitude of snakes, frogs, scorpions, spiders, lizards, and the like creatures. But this terrible bird can be made perfectly tame. On the Guiana plantations he may be seen fraternizing with the ducks and turkeys, accompanying them in their walks, defending them from their enemies, separating quarrelers with the strokes of his bill, sustaining the young and the feeble and waking the echoes with his trumpet while he brings home his flocks at night. The trumpeter is as handsome as he is useful. Noble and haughty in aspect, he raises himself up on his long, yellow gaitered legs and seems to say, "I am the trumpeter, the scourge of the reptile, and the protector of the flocks."

Paul Jones a Strategist.

Probably most of those persons who read the account of the dedication of the Paul Jones statue at Washington think of that daring seafighter as a man of strenuous action, a sort of sea knight. Paul Jones was, indeed, all of that, and he was a great deal more, concedes the Boston Transcript. He was a thinker, who thought deeply on naval strategy and naval organization, and, so far as our service is concerned, his designation as the "father of the American navy" is correct. Save toward the close of his life, and then under most unfavorable conditions, he never had a chance to put his ideas of strategy into action. The Russian navy, with which he served in the war against the Turks, was a poor school and one unwilling to learn from a great instructor.

The Wisdom of Johnny.

"Mamma," said Johnny, "if you will let me go just this one time, I won't ask for anything to eat."
"All right," said his mother. "Get your hat."
Johnny, perched on the edge of a big chair, became restless as savory odors came from the region of the kitchen. At last he blurted out:
"There's lots of pie and cake in this house."
The admonishing face of his mother recalled his promise, and he added:
"But what's that to me?"

Couldn't Be Possible.

"Seems to me your town is over-run with flies," asserted the visitor in Plunkville.
"Can't be," declared the loyal citizen. "No flies would dare hang around Plunkville with the daily paper full of diatribes against them."

Why It Was Hard.

"I want you to understand that I got my money by hard work."
"Why, I thought it was left you by your uncle."
"So it was; but I had hard work getting it away from the lawyers."

REMODELLING OF HISTORY

THEATRE OF OSTIA

REMAINS OF OSTIAN SHOPS

OSTIA, now that systematic clearance has succeeded to the spasmodic delving of Pionero and less scientific rummaging of yet earlier diggers, has become in certain respects the most enthralling of all the Roman sights. It has often been called the Pompeii of Latium, and certainly it is the only other place in Italy where one can ramble about the streets of a town of the empire with no modern architecture to intrude on one's dream. The ruins, however, differ greatly from those of Pompeii, because the ancient character and purpose of Ostia were different. The latter town was a bustling seaport with a cosmopolitan industrial population neither leisured enough to indulge private artistic tastes nor much disposed to them. The world's capital, only a few miles distant, was the natural home of Ostians of wealth or culture. But if we cannot see at Ostia the painted rooms and the courtyards set with statuary, which make Pompeii so attractive, we can see the framework of a more vigorous and momentous life, which makes a strong appeal to the imagination of anyone who has ever considered, however vaguely, what the Roman empire meant.

Streets Filled Up.

The extraordinarily untouched state in which the Ostia of the late imperial age has been preserved to our time is due to two agents, sand-drift and malaria. Silt brought down to the Tiber mouth, dried, pulverized, and wind-borne, has gradually filled up streets and ruined buildings deserted by men because of the fevers which were bred from choked-up harbors and channels of the river. Partly for fear of these fevers, partly because Civita Vecchia was found, ultimately, to be the better port for Rome, no considerable population has ever returned to Ostia, not even during a temporary revival in the fifteenth century, when the existing papal castle was built. The town had from the first a precarious existence. Its life was given to it by the Tiber, but the Tiber could not be trusted. The river silted up its harbors one after the other, and silted up itself. The port from which navies sailed to the Punic wars had become useless by the time of Augustus, and Claudius first and Trajan after him, had to dig out new basins at enormous expense some distance away to the north, and cut connecting channels, which the river proceeded to silt up as of old. In the end it proved impossible (or not worth while) to keep any port open into which the main current of the Tiber flowed; and if Trajan's fossa, or canal, dredged out anew by Pope Paul V., in the early seventeenth century, is still navigable for small craft working up to Rome, it is a channel only, and the huge spreading basins, that of Trajan as well as that of Claudius, are dry. Just because the river treated these new harbors as badly as the old, Ostia managed to maintain its life, and even to develop it, for some centuries longer, and only succumbed in the competition with Civita Vecchia (a new creation of Trajan's) after the empire has become Christian. If it had no proper basin for ships, it had always the main channel of the Tiber flowing past its walls, and had passage as this offered to ships, it was probably more to be depended on than the Claudian or Trajanic canals. Therefore, we find that in the second and third centuries, A. D., it was still worth while to erect great warehouses and long, narrow sheds for ships on the river bank, and that flourishing guilds, whose business lay with shipping, existed in Ostia. Such were the associations of boatmen, lightermen, and divers, whose official records have been found on stone; but the importance of the last-named is in itself a witness to the difficulties against which the port was struggling. For these divers had neither sponges

nor pearls to seek, but the cargoes of vessels which might be wrecked on the dangerous bar of the estuary or the sand-banks of the channel. In one way or another, however, Ostia kept a lively trade, and a polyglot population which bought and sold in the serried shops lining its paved streets. The religious cults of the place are alone enough to show how variegated the crowd must have been. Vulcan, the original god of the place, who had presided over its metal-workers since the days of the early kings (as Romans loved to believe), had had to accept a serious rival in Phrygian Cybele, and other competitors in Syrian Mithras, and Egyptian Isis and Serapis, as well as the Hebrew Yahweh, whose worshippers dwelt thickly about the new Claudian and Trajanic basins.

Wealth and Temples.

And all this population had to have its places of amusement, as well as its temples, and there was wealth enough to decorate these with statuary which the Graeco-Roman artists of the metropolis probably supplied. Among the best examples that have survived to be found in the recent excavations are a head of Aphrodite, and a full-length of a priestess, complete except for the right hand, and that nose-tip which has been chipped off ninety in a hundred ancient statues which still exist. She makes a gracious, matronly figure which, let us hope, did something to civilize the shrieking Levantine mob of Ostia. The main place of recreation, the Theater, built of brick with stone facing, in the Roman manner, is, relatively, less well preserved than the shops and houses. A big, outstanding building, it was a more obvious and profitable quarry for mediaeval builders. Nor had it been well treated in the imperial times. A summary restoration in the time of Honorius did much to obliterate the more worthy work of the third century emperors. The clearance of the city is still going on, year by year, at the expense of the Italian government, and the absent public is kept informed of constant discoveries by Signor Vaglieri's reports in the *Notizie degli Scavi*, the most systematic and unflinching record which any country issues concerning the recovery of its past. But no reading of many reports is worth a single visit to the ruins themselves, and those visitors to Rome who neglect to take the electric line to Ostia and to spend at least an afternoon in its Forum and streets will miss one of the most interesting places in Italy.

Conserved Food Disease.

Dr. Jacques Liouville, who was part of the staff of the antarctic expedition which recently returned to the north, has given the name "the disease of conserved food" to the malady which is the cause of most of the illness encountered on these expeditions. There is a very decided alteration in the composition of the blood, owing to a lack in the food of the necessary elements of health. The patients suffered from overpowering drowsiness and shortness of breath, which prevented them from taking part in marches or similar severe work. All these symptoms disappeared when a supply of fresh meat was obtainable.

Good for Several.

"Why do you call this new tire of yours the Mexican?" asked Slaters. "Is it made of Mexican rubber?"
"Oh, no!" said the inventor. "I call it that because it is capable of innumerable revolutions without wearing out."—Judge.

Caution.

"Mrs. Wetmore is one of the most cautious persons I have ever known."
"Yes. She was telling me the other day that she never kept a striking clock in the kitchen because she feared that if she did so the clock might acquire the habit."

FREE ADVICE TO SICK WOMEN

Thousands Have Been Helped By Common Sense Suggestions.

Women suffering from any form of female ills are invited to communicate promptly with the woman's private correspondence department of the Lydia E. Pinkham Medicine Co., Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence. A woman can freely talk of her private illness to a woman; thus has been established a confidential correspondence which has extended over many years and which has never been broken. Never have they published a testimonial or used a letter without the written consent of the writer, and never has the Company allowed these confidential letters to get out of their possession, as the hundreds of thousands of them in their files will attest.

Out of the vast volume of experience which they have to draw from, it is more than possible that they possess the very knowledge needed in your case. Nothing is asked in return except your good will, and their advice has helped thousands. Surely any woman, rich or poor, should be glad to take advantage of this generous offer of assistance. Address Lydia E. Pinkham Medicine Co., (confidential) Lynn, Mass.

Every woman ought to have Lydia E. Pinkham's 80-page Text Book. It is not a book for general distribution, as it is too expensive. It is free and only obtainable by mail. Write for it today.

Spared Money to Feed Her Mind.

An English typist who stated her earnings and expenditures in answer to the London Board of Trade's circular, spent \$2 for eight volumes of Grote's "History of Greece." Her weekly wage was \$6.25. During a year she spent \$5.50 on eleven birthday presents. A girl who earned \$4.25 a week bought pamphlets describing the English poor laws and poor law commission.

Telling the Age of a Horse.

The age of a horse may be judged by the appearance of the teeth because on the upper surface of the incisors a hollow is to be seen in the young tooth, which, not extending through the whole substance, naturally wears out with the wear of the tooth, and as a considerable degree of regularity occurs in the wearing away in all horses, it has been adopted as a general criterion of age.

British North Borneo.

British North Borneo has an area of 31,000 square miles and a population, according to the census of 1911, of 208,183. The European residents number 355, Chinese 26,202, Malays, 1,612, East Indians 5,511 and Filipinos 5,700. The number of natives cannot be more than approximately estimated but their number is placed at about 170,000.

Practical Has to Be Looked To.

A journalist talked recently with a struggling composer. He inquired whether the words of the great masters did not inspire the musician. The musician granted that they did, but that they did not inspire confidence in landlords when the rent was due, an occasion for which it was well to be prepared even if you had to play cheap melodies to do it.

Ancient Ophel Potteries.

French savants carrying out extensive investigations in Jerusalem, on the southeastern slope of the Temple hill—the Ophel of Scripture—have discovered a number of very early tombs, some of which contained pottery considered to belong to the period of 3,000 B. C.

Scaring Mice Away.

To keep mice away, scatter small pieces of camphor in your cupboards and drawers. They greatly dislike the smell of camphor, and will go far away from it.

Husbandly Trait.

"When does your husband find time to do all his reading?" "Usually when I want to tell him something important."

W. L. DOUGLAS SHOES

\$3.00 \$3.50 \$4.00 \$4.50 and \$5.00

FOR MEN AND WOMEN
Boys wear W. L. Douglas \$2.00, \$2.50 & \$3.00 School Shoes, because one pair will positively outwear two pairs of ordinary shoes, same as the men's shoes. W. L. Douglas makes and sells more \$3.00, \$3.50 & \$4.00 shoes than any other manufacturer in the world.

THE STANDARD OF QUALITY FOR OVER 30 YEARS.

The workmanship which has made W. L. Douglas shoes famous the world over is maintained in every pair.

Ask your dealer to show you W. L. Douglas latest fashions for fall and winter wear, notice the short vamps which make the foot look smaller, points in a shoe particularly desired by young men. Also the conservative styles which have made W. L. Douglas shoes a household word everywhere.

If you could visit W. L. Douglas large factories at Brockton, Mass., and see for yourself how carefully W. L. Douglas shoes are made, you would then understand why they are warranted to fit better, look better, hold their shape and wear longer than any other make for the price.

Fast Color Eyelets.
CAUTION.—To protect you against inferior shoes, W. L. Douglas stamps his name on the bottom. Look for the stamp. Beware of substitutes. W. L. Douglas shoes are sold in 75 own stores and shoe dealers everywhere. No matter where you live, they are within your reach. If your dealer cannot supply you, write direct to factory for catalog showing how to order by mail. Shoes sent everywhere, delivery charges prepaid. W. L. Douglas, Brockton, Mass.

CAMPBELL ADDS 32 NEW MEMBERS

In 1912 two things will widely advertise California. These are the expositions to be held in San Diego and San Francisco. We have here a magnificent valley of wonderful possibilities and climate unexcelled—the garden spot of the world with everything to draw people to us. Years ago when there was nothing here except mosquitoes and chaparral Bayard Taylor passed through here and predicted a glorious future for this section, but we have not as yet begun to realize our possibilities. But the words of Bayard Taylor were prophetic and we are on the eve of a realization of all he dreamed and more than he dreamed. Think of the wonderful growth of Los Angeles and think of Seattle which in ten years has become a rival of San Francisco; then think of what we have and is it not a surprise that we are not better known? I don't like to be a pessimist, but things are not going ahead with us as they should. Thousands who will visit San Francisco in 1915 are going to reach this valley but they are not going to benefit us if they travel through here at night in Pullman cars. They must be brought here for the attraction which the Redwood park will furnish. Think of what it will be when people come here in thousands in their automobiles from San Francisco. Think of what it will mean for this valley with all its beauty. I think from a business point of view the biggest thing we have is the park. It is the salvation of the Santa Clara valley and it means the making of the county famous. From a merely economic point of view it means everything for this section of California and will bring thousands of residents this way. Families will come here in hundreds and by thousands, and we will never more know what slow times are.

Promises Assistance.

Frank H. Benson promises to lend his assistance in the matter of procuring an appropriation for the park in the event of his election as a member of the legislature, and said that while he came to the meeting for the purpose of gaining information, he had not only gotten information but inspiration. "I want to get behind this movement and will do just so as hard as I know how," said Mr. Benson. "I will do everything possible to obtain the desired legislation for the proposed highways as I consider the park in the big, broad way you have undertaken."

The County Division Amendment

THE county division amendment to the Constitution, to be voted on November 5th, is now fully exposed, and is revolting to the lover of fair play.

By it, it is proposed, to make it easy for San Francisco to dismember four neighboring counties, taking from them their water-front on the Bay and the most of their population and leave the fragments to take care of themselves. All this in order to increase her bonding power and put her neighbors in debt for bonds the proceeds of which are to be for her benefit, which measure is offensive to the State.

California is to be helped by the rivalry between her commercial centers and not by a populatone monopoly that destroys competition. The State of Minnesota can furnish us an object lesson. When there was only a village at the Falls of St. Anthony, the city of St. Paul was indifferent, but when the vast water power of the Falls was conserved by a concrete apron, and a milling district began to appear and the town of Minneapolis sprang up, St. Paul wanted to annex the rising enterprise and population of her neighbor. This was resented by Minneapolis and the State of Minnesota kept hands off. The alertness of Minneapolis met and watched every attempt of her stronger neighbor, and as she fought for independence she grew until her population equaled that of St. Paul and then the fight was over. Then what happened? The two cities settled down to a rivalry and competition in enterprise, which has vastly benefitted Minnesota.

Now they are beautiful cities, with splendid streets, far-reaching boulevards, great factories, splendid public buildings and the pulse of their rival enterprises beats on the thick wrists of the whole State. That is what California wants in Oakland and San Francisco, and our people will not vote to prevent it. We want no political, or other monopoly, such as this penurious Amendment would create.

A HINT has come to the Mail that certain editors of Santa Clara are soon to begin a quiet but aggressive campaign against the saloon interests in that pretty home town with a view of making the town "dry" before 1915. Santa Clara at present is the only "wet" territory within the 4th and 5th supervisorial districts, and to make it "unanimous" is a most worthy object. It is admitted that the saloon interests are of no monetary benefit to a newspaper, and they are certainly a moral blot upon any community, absolutely and diametrically opposed to all morality, economic, municipal and home government, decency, good order, legitimate business, and all that. No newspaper has anything whatever to lose by coming out squarely against the saloons anywhere and everywhere. It is always a safe policy to champion a moral or just cause.—Los Gatos Mail.

THE gamblers and their supporters will all vote for the gambling bill for what it is. But these cannot muster the necessary votes to restore racetrack gambling in California. Honest men and women who oppose racetrack gambling must be tricked into voting for the gambling law or it cannot be carried. The gamblers hope to get these men and women to vote for their measure, just as they got Editor Barry to sign for it, namely, by representing it to be what it is not. The bill has been worded to make its purpose appear to be to suppress racetrack gambling; the title by which it goes on the ballot declares the measure an act to prohibit poolselling and bookmaking. And yet, under its provisions, racetrack gambling will be revived in California. And for such is the measure intended.—Gilroy Gazette. Vote "No".

IN these days of strife between great political parties we must remember that after all we are just a band of brothers here on earth, traveling from cradle to the grave. We live side by side, our children attend the same school and after the smoke of the battle has cleared away, we will be friends and neighbors. Let the bitter things go unsaid. At best, life is short, and we get out of it a full measure of sorrow. Let us in our little city live as one big, good natured family.—Schoolcraft (Mich.) Express.

DID you ever stop to think that the fellow who does the effective boosting should not be overlooked. Boost him by giving him a little of your business. For instance, your home newspapers. The boosting spirit is kept at high ebb by printers' ink. And often the printer is overlooked and, like the preacher, must exist on promises and climate, —Richmond Terminal.

THE Worlds Series games for 1912 are history and Boston is the winner, 4 games out of seven. It was one of the greatest contests in the history of our national game and 92,000,000 people were on the anxious seat most of the time, boosting for his home team. Now that it is settled let us return to our daily tasks and politics.

ON the various amendments and other propositions the greatest care should be taken to acquaint oneself with the exact meaning of them. Here's a suggestion; Vote "Yes" on the Free text book proposition which is second on the ballot. Vote "no" on the race track gambling initiative which is number seven on the ballot.

OUR village certainly sounds very industrious and business like when the whistles on the various plants speak up. And indeed it is a busy place, much of the work being done without the whistle advertisement. We want more whistles, it is sweet music to our ears.

THE number of Wilson—Republicans to be found in this vicinity is certainly amusing to an onlooker when the precinct has always been overwhelmingly republican with anti-Wilson tendencies.

GOLD REPORTS ON ALASKA.

The United States Geological Survey has just published as Bulletin 520-H a report on the mining and water supply of the Fortymile, Seventymile, Circle, and Fairbanks districts, Alaska, by E. A. Porter and C. E. Ellsworth. The estimated value of the combined gold production of the Fortymile and Seventymile districts for 1911 was \$212,000, an increase of \$12,000 over the output for 1910 due to the success of two dredges on the headwaters of Fortymile River. The value of the gold production of the Fairbanks district in 1911 is estimated to be approximately \$4,500,000, a decrease of \$1,600,000 from the output for 1910, due mainly to the fact that most of the bonanzas of the camp have been worked out and the major part of the mining was confined to deposits of relatively low grade. The Circle precinct in 1911 produced gold with an estimated value of \$350,000, which exceeds that of any other year since 1898. The increase was due entirely to the improved methods employed.

Notice to Subscribers

A blue circle around this notice indicates that your subscription has expired and it is the hope of the editor that you will renew for another year. If we do not hear from you at once we will understand that you wish the paper continued. If you should see a blue cross thru this notice, that means that the Post Office forbids us sending the paper any longer without paying an increased rate of postage; therefore this is the last paper you will receive until accounts are squared up. We will be liable to a fine or misuse of the mails if the paper is continued.

Farm Implements

There's nothing needed on the farm that you will not find in our stock. And the implements on our floors are the very best of their kind. We have been serving the farmers and orchardists of this section for a good many years and we know exactly what they want. We've studied their needs and secured the agency for those lines that are best, adapted to the requirements of this territory. See us for plows, cultivators, harrows and farm implements of all kinds.

The Home of Hirsh Wickwire Suits & Overcoats

There are men all over this county who come to Pomeroy Bros. regularly for whatever they need in Suits, Overcoats, and Furnishings. And the number of men is growing daily.

Why do they come? Because they like the satisfying assortments we show—they like the invariable good quality that runs throughout the entire stock—they like the sort of courteous helpful service they get here—they like everything about this store because we've studied the needs of men for years and we know just what will please them.

In suits and overcoats we feature the celebrated Hirsh Wickwire line. Fall and winter suits at \$15 to \$40. Overcoats at \$15 to \$40.

Hats, Shirts, Underwear Etc.

We don't overlook the lesser things. This is the only San Jose Store that sells the Strand \$3 Hat. We have plenty of others, too, in various shapes and shades and at various prices. You'll find all the best things in shirts here, and winter underwear, and ties, and socks, and anything else you need.

STOCKHOLDERS' MEETING

To the Stockholders of the Bean Spray Pump Company, a corporation:
NOTICE IS HEREBY GIVEN THAT a special meeting of the stockholders of the Bean Spray Pump Company, a corporation, has been called by the Board of Directors for and will be held at two o'clock P. M. of Tuesday, the 3rd day of December, 1912, at and in the office of said corporation, at the principal place of business of said corporation, and at the building where the Board of Directors of said corporation usually meet, to-wit: No. 217 West Julian Street, in the City of San Jose, County of Santa Clara, State of California.

And that the object and purpose of the said meeting is to consider and vote upon the proposition of increasing the capital stock of such corporation to Five Hundred Thousand Dollars and of so increasing said capital stock to said amount, which is the amount to which it is proposed to increase said capital stock.

And for acting on such other business as may properly come before said meeting,
D. C. CRUMMEY, President,
J. D. CRUMMEY, Secretary.

Catarrh Cannot be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Catarrh Cure is not a quack medicine. It was prescribed by one of the best physicians in this country for years and is a regular prescription. It is composed of the best tonics known, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Catarrh. Send for testimonials free.
